Over 1.2k+ Happy Customers

Frequently Asked Questions

Do I have to purchase the package for every user in my organization? Yes, every user will need to be assigned a security package.

Can I get my Microsoft licenses through Microsoft directly and still get a security package? All our customers are required to get their Microsoft licenses through BEMO. The licensing and the security package cannot be separate. This is how we are able to gain access to your tenant to enable all of the security features in our various BEMO packages, as well as provide break-fix support for your Office Suite.

Does BEMO support a Hybrid infrastructure? No, to provide the most efficient and safe environment, BEMO only supports cloud-only M365 and Azure.

How does BEMO get access to our system if we choose a cybersecurity package? We use GDAP (Granular Delegated Admin Privileges) to remotely access your system for maintenance and support purposes. GDAP is a secure platform that enables granular and delegated access instead of a Global Administrator role based on the specific needs and permissions granted to BEMO. To learn more, visit our blog post on GDAP.

Monthly Per User Price *

Silver $60

Diamond $84

Platinum $134

Standard availability is Mon-Fri 5AM-5PM Pacific but 24/5 and 24/7 are available to purchase.
