BEMO Cybersecurity Framework

Zero-Trust Approach for End-to-End Protection

- With the BEMO Platinum Package, we configure security for your email, corporate and personal devices, documents, identity, guest management, cloud app, network, insider risk and configuration controls using up-to-date best practices.

Detect Attacks Before They Cause Damage

- Dedicated BEMO Monitoring and Maintenance Team of security analysts who 24x7 monitor your tenant for any suspicious or malicious activity, leveraging Sentinel SIEM
- You'll have access to a Company Incident Response plan and 24x7 Incident Response team in case of attack/breach

Unified View of Assets and IT Reviews

- We proactively update your security configuration according to Microsoft changes and new employees to shore up any gaps in your defenses.
- View and assess your risk with Microsoft Secure Score
- Quarterly Security Attestation Letters, Business and Security Review

True security goes beyond just protection measures. Here's how BEMO's Platinum Cybersecurity package fits within our comprehensive framework to secure your business.

Frequently Asked Questions

Do I have to purchase the package for every user in my organization? Yes, every user will need to be assigned a security package.

Does BEMO support a Hybrid infrastructure? No, to provide the most efficient and safe environment, BEMO only supports cloud-only M365 and Azure.

Can I get my Microsoft licenses through Microsoft directly and still get a security package? All our customers are required to get their Microsoft licenses through BEMO. The licensing and the security package cannot be separate. This is how we are able to gain access to your tenant to enable all of the security features in our various BEMO packages, as well as provide break-fix support for your Office Suite.

How does BEMO get access to our system if we choose the Platinum package? We use GDAP (Granular Delegated Admin Privileges) to remotely access your system for maintenance and support purposes. GDAP is a secure platform that enables granular and delegated access instead of a Global Administrator role based on the specific needs and permissions granted to BEMO. To learn more, visit our blog post on [GDAP](#).

Monthly Price \$99 / user
20 seats minimum purchase

Required Microsoft Licenses:
M365 E5 or G5

Speak with us here

"From start to finish, BEMO had a fantastic process that exceeded our expectations and helped us reach our goals. It is such a relief to have a company like BEMO that we can turn to for our IT and cybersecurity needs."
