BEMO Cybersecurity Framework

Zero-Trust Approach for End-to-End Protection

- With the BEMO Silver Package, we configure your email, corporate device, and identity security using up-to-date best practices.

True security goes beyond just protection measures. Here's how BEMO's Silver Cybersecurity package fits within our comprehensive framework to secure your business.

PROTECT

DETECT & RESPOND

IDENTIFY

Detect Attacks Before They Cause Damage

- We monitor and send you automatic notifications about risky sign-ons, device and email malware, spam, phishing and other threat attempts.
- Microsoft Defender for Endpoint automatically remediates potentially compromised assets
- In the rare case a breach does occur, with the Silver Security Package, you get up to 80% off your BEMO expert remediation cost!

Unified View of Assets

- We proactively update your security configuration according to Microsoft changes and new employees to shore up any gaps in your defenses.
- View and assess your risk with Microsoft Secure Score

Frequently Asked Questions

What if our company uses another Anti-virus software and disables Microsoft Defender Antivirus? You can use a non-Microsoft antivirus solution with Microsoft Defender for Endpoint. However, we advise to use Microsoft Defender Antivirus together with Defender for Endpoint. Not only is Microsoft Defender Antivirus an excellent next-generation antivirus solution, but combined with other Defender for Endpoint capabilities, such as endpoint detection and response and automated investigation and remediation, you get better protection that's coordinated across products and services.

Do I have to purchase the package for every user in my organization? Yes, every user will need to be assigned a security package. If you have frontline workers with F3 licenses, we can offer Silver for Frontline for those users at a reduced price.

How does BEMO get access to our system if we choose the Silver package? We use GDAP (Granular Delegated Admin Privileges) to remotely access your system for maintenance and support purposes. GDAP is a secure platform that enables granular and delegated access instead of a Global Administrator role based on the specific needs and permissions granted to BEMO. To learn more, visit our blog post on GDAP.

Can I get my Microsoft licenses through Microsoft directly and still get a security package? All our customers are required to get their Microsoft licenses through BEMO. The licensing and the security package cannot be separate. This is how we are able to gain access to your tenant to enable all of the security features in our various BEMO packages, as well as provide break-fix support for your Office Suite.

Monthly Price $60/user*
10 seats minimum purchase

As of April 2025, annual contract, price subject to change, contact BEMO for latest pricing.

Required Microsoft Licenses: Business Premium + Azure AD P2 (2) *or* M365 E5

Speak with us here

"From start to finish, BEMO had a fantastic process that exceeded our expectations and helped us reach our goals. It is such a relief to have a company like BEMO that we can turn to for our IT and cybersecurity needs."
